

I have been an xm subscriber for about 1 1/2 yrs., It provides me with information and entertainment that I cant get from regular radio. I am an interstate truck driver that depends on news,weather, and traffic reports that I can't get from regular radio when I need it.

It is xm's constitutional right to provide this service to me and millions of other customers that not only want this service, but depend on it.

It is nothing more than compatition that will keep all parties honest and striving for better quality
